

# PVWJ Pumps

## Engineered for Better Performance

### The new PVWJ open loop, axial piston pump

Oilgear's new PVWJ open loop, axial piston pump delivers enhanced stability and less maintenance in low- to medium-horsepower industrial and mobile hydraulic applications. An improved design from the PVWH pump, the PVWJ is **completely interchangeable** with the PVWH unit, equipped with identical port locations, sizes, shafts and mounting flanges allowing for easy, worry-free installation. And, the new PVWJ pump eliminates control noise with improved stability, incorporates static seals (o-rings) and features a more aesthetic design, effectively meeting today's market needs.

See the difference...PVWJ vs. PVWH pumps

# Oilgear

### Features and Benefits:

- 1 Available in three frame sizes and ten displacements
- 2 Completely interchangeable with the PVWH pump
- 3 Less seal maintenance through removal of gaskets
- 4 New static seal (o-ring) design
- 5 Improved aesthetic design
- 6 Enhanced stability and reliability
